Concrete Solutions® Roll-Top™ system provides a simple and effective way to restore and recolor faded or discolored concrete. The cementitious coating is roller applied, much like paint, and is ideal for use over smooth, stamped and broom finished concrete. When used in conjunction with integral color, antiquing powder, stain and dye, Roll-Top cementitious coating system can achieve a variety of both natural and modern looks.

The Roll-Top system is most frequently used over the StoneCrete™ Tile System, but it can also be used with a number of other Concrete Solutions systems including the 1/4" Stamping and Broom Finish Systems. This revolutionary product covers most previously sealed or unsealed surfaces in one coat without the need for a primer, and dries rapidly to form a smooth, even finish.

PRODUCTS YOU MAY NEED:

- Roll-Top™ Micro Topping
- Davis Integral Color
- Antique Release Powder SC
- StoneSeal™
