DURING INSTALLATION

AFTER ROLL-TOP

Concrete Solutions® StoneCrete™ Tile System is a patented stamped concrete alternative that provides the same elegant and sophisticated natural stone, brick, slate or tile appearance. It is applied directly over existing concrete, which eliminates the time and expense of demolition while still achieving a renewed look.

The StoneCrete Tile System is ideal for use on driveways, pool decks, patios, walkways, porches, garages and more. The gray concrete tiles are produced before the job begins in a controlled environment, which removes jobsite variables and ensures perfect texture in every application. Once installed, tiles can be colored to achieve a variety of looks using Integral color with Concrete Solutions Roll-Top or Spray-Top® cementitious coatings and acid or water based stains.

### PRODUCTS YOU MAY NEED:

- |                            |                         |
